

include/beecrypt/aes.h

```
graph TD; A[include/beecrypt/aes.h] --> B[beecrypt/beecrypt.h]; A --> C[beecrypt/aesopt.h];
```

The diagram illustrates a header file dependency. At the top, a grey box contains the text 'include/beecrypt/aes.h'. Two blue arrows originate from the bottom of this box and point downwards to two separate white boxes. The left white box contains the text 'beecrypt/beecrypt.h' and the right white box contains the text 'beecrypt/aesopt.h'. This visualizes that 'include/beecrypt/aes.h' includes both 'beecrypt/beecrypt.h' and 'beecrypt/aesopt.h'.
